PROFESSIONAL SUMMARY

ServiceNow Developer with 3.10+ years of hands-on experience in ServiceNow development and customization across ITSM, ITOM, and CSM modules. Proven expertise in Incident Management, Problem Management, Change Management Asset Management, and Service Catalog / Service Request workflows. Skilled in translating complex business requirements into scalable ServiceNow solutions using Client Scripts, Business Rules, UI Policies, and Workflow automation. Strong communicator with a track record of delivering high-quality platform solutions, CMDB governance, comprehensive reporting and dashboards, and end- user support across Agile delivery environments.

KEY ACHIEVEMENTS

★ **30% Reduction in Incident Resolution Time —** through intelligent automation of Incident Management workflows, SLA enforcement, and auto-routing rules.

★ **40% Improvement in Service Request Efficiency —** by redesigning Service Catalog items, Order Guides, and Record Producers to streamline fulfillment.

★ **Enhanced CMDB Accuracy & Governance —** by configuring Data Sources, Import Sets, and Transform Maps aligned to CSDM best practices.

★ **Recognized for High-Quality ServiceNow Solutions —** consistently delivering solutions that exceed business requirements, improve usability, and pass rigorous QA testing.

TECHNICAL SKILLS

ServiceNow Modules: ITSM (Incident, Problem, Change, Asset Management), Service Catalog / Service Request, CMDB, ITOM, CSM

Development: Client Scripts, Catalog Client Scripts, UI Scripts, UI Policies, UI Actions, Business Rules, Workflow Editor, Flow Designer, Scoped Applications

Administration: Access Control Rules (ACLs), Update Sets, Import Sets, Transform Maps, Data Sources, Next Experience UI, Multi- Domain Instances

Reporting & Dashboards: ServiceNow Reports, Dashboards, Performance Analytics, Incident Templates

ITIL & Processes: Change Management, Incident Management, Problem Management, Knowledge Management, SLA Management, Service Request Management

Languages & Database: JavaScript, HTML, MySQL

Methodology: Agile / Scrum

Certifications: ServiceNow Certified System Administrator (CSA)

Soft Skills: Problem Solving | Communication | Stakeholder Management | Team Collaboration | Time Management | Client Relationship Building

PROFESSIONAL EXPERIENCE

ServiceNow Process Executive – Developer | Cognizant, Hyderabad *May 2022 – March 2026*

- Developed and customized ServiceNow ITSM portals, workflows, and automation solutions, reducing Incident resolution time by 30% through automated routing, escalation rules, and SLA monitoring across Incident, Problem, and Change modules.
- Designed and optimized Service Catalog items, Record Producers, and Order Guides, improving Service Request fulfillment efficiency by 40% and reducing manual processing across IT, HR, and Facilities services.
- Configured and governed CMDB through Data Sources, Import Sets, and Transform Maps, aligning CI data to Common Service Data Model (CSDM) framework and improving asset traceability and data accuracy.
- Implemented Client Scripts, Catalog Client Scripts, UI Policies, UI Actions, and Business Rules to automate business logic, validate data, and streamline workflows on both client and server sides.
- Created and enforced Access Control Rules (ACLs) to ensure secure, role-based data access across ITSM modules, meeting compliance and audit governance standards.
- Developed comprehensive reports, dashboards, and Incident templates for real-time ITSM KPI visibility; demoed dashboards and reports to internal stakeholders, enabling data-driven decision-making.

KEY PROJECTS

1. ITSM Incident & SLA Automation – Cognizant Internal Operations

- Designed an end-to-end Incident Management automation in ServiceNow using Flow Designer and Business Rules, incorporating auto-assignment, priority-based SLA thresholds, and escalation workflows, achieving a 30% reduction in MTTR.
- Built auto-categorization logic leveraging CMDB CI relationships to route incidents without manual triage, significantly reducing analyst effort.
- Created real-time Performance Analytics dashboards tracking SLA compliance, breach rates, and team workload for proactive management visibility.

2. Service Catalog Redesign & Request Fulfillment Optimization

- Redesigned the end-user Service Catalog with structured catalog items, Record Producers, and multi-step Order Guides, improving Service Request efficiency by 40% and reducing form errors through dynamic UI Policies.
- Integrated fulfillment workflows with Change Management and Incident Management modules for seamless cross-module ticket creation and automated RITM processing.

3. CMDB Health & CSDM Governance Implementation

- Led a CMDB data quality improvement initiative by configuring multiple Data Sources, Import Sets, and Transform Maps to onboard CI data from discovery and external ITSM feeds.
- Aligned CMDB structure to CSDM framework, establishing proper service relationships between Business Applications, Technical Services, and supporting CIs; implemented ACLs for CI record governance and audit readiness.

EDUCATION

Postgraduate in Embedded Systems *CGPA: 7.65*
Stanley Engineering College, Hyderabad | 2021

Bachelor of Technology (B.Tech) *69%*
Kakatiya University (KU), Warangal | 2018

CERTIFICATIONS

- ServiceNow Certified System Administrator (CSA) — ServiceNow
